

Expert Full Stack Developer

Location
Bangkok, (Thailand)

Job level
Expert

About the Job

As an Expert Full Stack Developer at Allianz Technology, you will be responsible for designing, developing, and maintaining comprehensive web applications that support our partner projects. You will work closely with cross-functional teams to ensure seamless integration of front-end and back-end components, delivering high-quality solutions that meet business objectives. Your role will involve optimizing performance, ensuring security, and implementing best practices in full stack development. Additionally, you will leverage AI technologies to enhance application functionality and drive innovation.

What you do

- Design, develop, and maintain high-performance web applications, ensuring seamless integration of front-end and back-end components.
- Collaborate with cross-functional teams to gather and analyze requirements, ensuring alignment with business objectives.
- Optimize applications for maximum speed and scalability, ensuring a seamless user experience.
- Implement security and data protection measures to safeguard sensitive information.
- Write clean, maintainable, and efficient code, following best practices in full stack development.
- Conduct code reviews and provide constructive feedback to team members.
- Troubleshoot and resolve issues in existing applications, ensuring minimal downtime.
- Stay up-to-date with emerging technologies and industry trends to continuously improve development processes.
- Operate across the full stack with AI as a force multiplier — use GitHub Copilot, Claude Code, Cursor, or equivalent AI assistants daily for frontend, backend, and API development; generate tests, write documentation, and conduct AI-assisted code reviews as a matter of routine.
- Integrate AI/ML capabilities into applications — apply LLM APIs, intelligent automation, and AI-enhanced UX patterns where they add real value; evaluate and advocate for practical adoption of emerging AI tooling across the AZP stack.

What you bring

- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent work experience).
- 7 years of experience as a Full Stack Developer, with a strong understanding of front-end and back-end technologies.
- Proficiency in front-end frameworks such as Angular, React or Vue.js.
- Experience with back-end technologies such as Java and Spring boot.
- Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.
- Strong understanding of RESTful API design and development.
- Experience with version control systems, such as Git.
- Excellent problem-solving skills and the ability to work collaboratively in a team environment.
- Basic knowledge of AI technologies, principles, and their practical use.
- Experience in integrating AI algorithms and models to enhance application capabilities and decision-making.
- Fluent daily use of **AI coding assistants** (GitHub Copilot, Cursor, Claude Code, or equivalent)

[Please keep context below this]

What we offer

- We offer a hybrid work model which recognizes the value of striking a balance between in-person collaboration and remote working.
- We believe in rewarding performance, and our compensation and benefits package includes a company bonus scheme, pension, employee shares program, and multiple employee discounts (details vary by location).
- From career development and digital learning programs to international career mobility, we offer lifelong learning for our employees worldwide and an environment where innovation, delivery, and empowerment are fostered.
- Flexible working, health, and wellbeing offers (including healthcare and parental leave benefits) support balancing family and career and help our people return from career breaks with valuable experience.
- Work from home allowance.
- Comprehensive health insurance extends beyond employees to cover their loved ones.
- We offer a premium gym membership to support well-being and a healthy work-life balance.
- An on-site playroom and a variety of engaging activities are available to help employees unwind and recharge.

About Allianz Technology

With its headquarters in Munich, Germany, Allianz Technology is Allianz's global IT service provider and delivers IT solutions that drive the group's digitalization. With more than 11,000 employees in over 20 countries around the world, Allianz Technology is tasked with running, optimizing, transforming, and innovating the infrastructure, applications, and services together with Allianz companies to co-create the best customer experience. We service the entire spectrum of digitalization – from one of the industry's largest IT infrastructure projects that spans data centres, networks, and security, to application platforms ranging from workplace services to digital interaction. In short: We deliver comprehensive end-to-end IT solutions for Allianz in the digital age. We are the backbone of Allianz. Find us at: www.linkedin.com/company/allianz-technology.

Commitment to Integrity, Fairness & Inclusion

Allianz Technology is proud to be an equal opportunity employer dedicated to fostering an inclusive work environment for everyone. We embrace individuals of all gender identities and expressions, sexual orientations, ethnicities, ages, nationalities, religions, disabilities, and philosophies of life. Ultimately, our greatest strength as a company lies in the unique skills, experiences, and backgrounds our employees contribute.

To Recruitment Agencies:

Allianz Technology has an in-house recruitment team that sources great candidates directly. Therefore, Allianz Technology does not accept unsolicited resumes from agency or search firm recruiters. When we engage with recruitment agencies, the partnership is formalized by a contract. Fees will only be paid when there is a contract in place. Without a contract in place, we will not accept invoices on unsolicited resumes, even if the candidate is ultimately employed by Allianz.
